# cable-snake® cube

- Durable tread resistant links
- Segregate power and data cables
- Ideal for height adjustable tables

œ

cable-snake® cube

Cable-Snake® CUBE with its 2D/3D flex system and unique Gecko kit option is the ideal vertical cable management solution designed for height-adjustable tables.

The compact and elegant twin compartment CUBE umbilical enables efficient cable management and segregation of power and data cables. The 2D section provides tidy cable management during the up-down motion of the table and the 3D section is a great extension piece to provide further cable management across the floor.

Cable Snake integrates seamlessly with QikTray for a comprehensive cable management solution.
